Expense Reimbursement System

By Zimi Li

Zimi.li@revature.net

Features

- Employee can login to create reimbursement and view past reimbursement (filter supported)
- Manager can login to view all reimbursement and approve/deny reimbursement (filter supported)
- Register with email, password will be sent through email
- Password is encrypted in the database using Bcrypt
- You can upload an image when creating reimbursement
- Image is persistent in the database
- Error checking (session): avoid unauthorize view (Employee can not view the reimbursement which does not belong to him)
- Mockito test (In order to package war file, suggest use version 2.22.0 above)
- Log4j log
